S.No	Website	Bug Report	Title	Steps to Reproduce	Expected Result	Actual Result	Severity
1	https://todomvc.com/examples/react/dist/	Completed Task Disappears on Refresh	Completed tasks do not persist after refreshing the page.	1. Open the application in a browser. 2. Add a task (e.g., "Task 1"). 3. Mark the task as completed. 4. Refresh the browser page.	The completed task should remain visible under the "Completed" filter.	The completed task disappears completely from the list.	High (Impacts user experience and data persistence).
2	https://todomvc.com/examples/react/dist/	Duplicate To-Do Can Be Added	Application allows submission of same name to-do items.	1. Open the application. 2. Click inside the task input field type the same name one after the other. 3. Press "Enter" key.	The application should prevent duplicate(same name) tasks from being added.	Duplicate task names appears in the list, affecting usability.	Medium (Impacts data integrity but does not crash the app).
3	https://todomvc.com/examples/react/dist/	Bulk Clear Does not Update Counter Correctly	Task counter does not update after clearing completed tasks.	1. Open the application and add multiple tasks. 2. Complete one or more tasks. 3. Click "Clear completed" to remove finished tasks.	The counter updates to reflect only remaining tasks.	The counter sometimes remains unchanged, displaying an incorrect number.	Low (A minor UI issue but could cause confusion).
